Chapter 1: Project Description

1.1 Background

Godawari is a Municipality in Lalitpur District in Province no 3 of Nepal that was established on 2 December, 2014 by merging the former Village Development Committees (VDCs) viz. Old Godawari, Badikhel, Bishankhunaryan, Godamchaur and Thaiba. The Municipality area was again expanded in March 2017 to include in total 12 previous VDCs. The six VDCs added were Devichaur, Dukuchhap, Chhampi, Thecho, Chapagaun, Jharuwarasi and Lele. The center of this rural Municipality is located at Bajrabarahi. It is one of the popular hiking destinations in Nepal for its rich wildlife and splendid environment. Godawari is also famous for its botanical garden. "Phulchowki" is located in Godawari which is the highest peak in Kathmandu valley.

Godawari Municipality, Lalitpur, is going to prepare the GPS based Digital Profile of the Municipality that includes Land Use, Demography, Physical Infrastructure, Socio-Economic Condition, Natural and Human Resource etc realizing that the information is the key for making long term plan of the municipality. The Local Government Operation Act 2074 clearly stated that Local government should identify the resources, analyze the strengths & opportunities, challenges & problems of the Municipality and set up vision for the municipality. The reliable information on demography, land, infrastructure, socio, economic and environment is expected from the Digital based profile of the Municipality which shall be used for formulating priority policies & plan/programs of the municipality, developing appropriate structures, allocating budget and execution of policies and plan accordingly.

1.2 Objective of the assignment

Godawari Municipality has a plan to keep digital records of all households and institutions so as to make the communication with the residents easier and deliver better services. Considering the above purpose, the main objective of the assignment/study is to prepare / digitalize the detailed socio – economic data of every single household as well as institution of the Municipality to facilitate the Municipality in decision making, policy & plan formulation and effective service delivery.

The Municipality has expected from the assignment to develop and deliver fully developed digitalized information of household and institutions to be used by the Municipality and ward offices which is integrated with GPS location.

1.3 Key Deliverables

A complete profile comprising of relevant data and information as follows

- i. Demographic like population chart, migration trend, growth trend etc.
- ii. Socio economic like health and education, gender, income, and occupation.
- iii. Physical Infrastructures like road, electricity, telecommunication, water supply drainage and sewerage etc.
- iv. Existing Land use pattern/classification Agriculture, Forest, road, residential areas, urban areas, commercial, institutional, open spaces. Playground, rivers, lake, pond, religious centers/areas.
- v. Environmental status like sanitation, solid waste, pollutions.
- vi. Analysis of collected data - present in charts, diagram and graphs as per requirements.
- vii. Development of user friendly application for different hierarchy of users.
- viii. An up to-date profile comprising of base-line information of the existing physical, social, environment financial and organizational state of the municipality. Apart from the key statistics, such base- line information shall also include textual descriptions, and key problems prevailing in the wards and the municipality.

1.4 Methodology/ Process

The following methodology/process will be adapted for timely and effective delivery of expected output of the assignment/study:

Step 1: Overall preliminary preparation and planning for field mobilization and questionnaire finalization

- Assignment professional expert staff for the study
- Design the study questionnaires and checklists and finalization with municipal coordinators
- Arrangement of logistics including computers, printer, scanner, photocopier, and vehicle
- Discussion and agree on field mobilization plan with clear roles and responsibilities

Step 2: Organize Municipal level orientation meeting and field level meeting.

- Undertake necessary training programs to municipal as well as departmental technical personnel on data collection, management and other relevant computer skills that are required in connection to profile preparation

Step 3: Preparation of compatible mobile application for household/ Institutional data collection and training for enumerator as well as municipal coordinators.

- Site Architecture plan developed and site map is delivered
- Visual design concept developed
- Graphics & page layout designs are rendered
- XHTML/CSS templates prepared
- Content Management System is configured
- Beta testing begins
- Training to enumerators and municipal coordinators

Step 4: Conduct socio-economic census of individual households and institutions using mobile based questionnaire and GPS. The questionnaire and the working procedure will be as per the Rural /Urban Profile preparation Procedure, 2075.

- Mobilize field enumerators for collecting socio-economic data of individual households and institutions
- Quality assurance by expert professionals during field data collection

Step 5: Data Analysis, presentation, feedback and finalization and capacitate Municipality Officials and go on Live

- Analyze and present the data collected from the field for feedback and finalize based on the Feedback.
- Train Municipality and ward executives to make them familiar / well versed in using the software.
- Handover the Digital base profile to the Municipality and **Go on Live** - the Information System will be scalable so that in future all residents can login to the system to view their details and update or request for update accordingly.

1.5 Project Location

Godawari Municipality is located in Bagmati Province formed as a Municipality in 2073 BS. The location of the GPS based Digital Profile of the Municipality will be in the Ward number 10, 11, 12, and 13 of the municipality.

1.6 Time line of assignment/ study

The assignment is effective from 10 Chaitra 2076 and will be ended on 09 Ashad 2077. The key deliverables and proposed timeline is as follows:

S N	Deliverables	Baishak				Jestha				Ashar			
		W 1	W 2	W 3	W 4	W 5	W 6	W 7	W 8	W 9	W 10	W 11	W 12
1	Step 1: Overall Preliminary preparation and planning for field mobilization and questionnaire finalization												
	Assignment professional expert staff for the study												
	Design the study questionnaires and checklists												
2	Step 2: Organize Municipal level orientation meeting and field level meeting for finalization of questionnaire												

3	Step 3: Preparation of mobile application for household/ Institutional data collection and training for enumerator as well as municipal coordinators												
4	Step 4: Conduct socio-economic census of individual households and institutions using mobile based questionnaire and GPS.												
5	Step 5: Data Analysis, presentation, feedback and finalization and capacitate Municipality Officials and go on Live												

Chapter 2: Godawari Municipality an Introduction

2.1 Background:

The Constitution of Nepal provides that the basic structure of the Federal Democratic Republic of Nepal shall be three-tiered at the Federal, State and Local levels and all three levels shall exercise state power in accordance with the Constitution and the law. The interrelationships at the Federal, State and Local levels are based on the principles of co-operation, coexistence and co-ordination. According to the Constitution of Nepal, Schedule 8 lists the rights to collect local data and records, Schedule 6 lists the rights at the local level and in Schedule 17 lists the rights related to the collection of data on unemployment. The work detail report on Federal, State and Local Level rights approved by the Government of Nepal provides local level policy, legislation, and criteria formulation, basic statistics of local level including unemployment statistics, statistical records of potential natural, physical and cultural resources, information and technology data management. As per the interpretation of the above Constitutional Provisions and Rights, the Village and Town Material Statement Preparation Procedure, 2074 BS has been issued with the basic process, method and forms for preparing detailed and fragmented data of local level. The main objective of the working procedure is to standardize the data collection methods, procedures, tools and procedures by maintaining uniformity and standardization in the minimum issues of basic data, information or data collection, analysis and management essential for preparation of policies, plans and programs for development process and service delivery Guidelines have been provided to prepare village or town material details in the format.

According to the Constitution of Nepal, the work detail report of the Union, State and local level approved by the Government of Nepal, the bill related to local level governance and management and the order related to the operation and management of local level service, 2074 It has been given the responsibility of preparing, implementing and monitoring the annual, periodical and strategic and long term plans of its region. Accordingly, it is necessary to prepare strategic / periodical, integrated and annual plan of the local level and to prepare material details of the local level including the regional situation for monitoring the results. It is necessary to include the analysis and presentation of statistics of physical, natural, religious, cultural, social and human resource resources within the Municipality in the areas of economic, social, physical infrastructure, forest and environment and institutional development.

Material details provide an important basis for decision-makers and development providers to make local planning formulation and monitoring information-based, systematic, integrated, result-oriented, participatory and effective. Therefore, it is necessary to collect the basic details required for planning, results monitoring and service delivery in the commodity statement and update it in a certain period to ensure proper utilization of available resources.

The city profile of Godawari Municipality has been prepared with the aim of sustainable information management even from the economic point of view by publishing and updating the objective details on the basis of collection, storage, processing and analysis of information based on information technology.

The Ministry of Federal Affairs and General Administration has directed all the local governments of the country to prepare village and town profiles to establish the single rights and other common rights given to the local governments by the Constitution of Nepal 2072 and the Local Government Operation Act 2074 at the local level. Was requested. Taking this issue into consideration, Godawari Municipal Background has been prepared for the integrated town development of Godawari Municipality by collecting data through household survey within the city area and reflecting the condition and situation of the entire municipality.

As per the Local Level Service Operation and Management Order, 2074 BS, the Local Level Governance Bill is under discussion, as per the decision of the Council of Ministers of the Government of Nepal for immediate local level governance operation and management Has been Schedule 3 of this order mentions the collection of local data and records and Schedule 4 mentions the procedure for the ward offices to formulate plans and update the data. In the present order, data on demographic, natural, economic, social, cultural, physical infrastructure, employment status, gross domestic product, per capita income, human development index, revenue and budget has been collected and processed. As the archives are referred to as the work, duties and rights of the village Municipality or municipality, the background of Godawari Municipality has been prepared accordingly.

Article 1 of the Directive on Local Level Planning and Budgeting, 2074 states, “Every local level should formulate annual plans and budgets through participatory process in a result-oriented manner. The profile of Godawari Municipality has been prepared accordingly. Local Government Operations Act: Sub-section 2 of sub-section 2 (f) and (3) of paragraph 3 of section 11 of the Local Government Act 2074, (2), (4), (5) and (6) of local records management, sub-section 2 of section 11 (1), (2) (3), (4) and (5) Unemployment data collection and the work of the ward committee under section 12, up-to-date data under sub-section 2 (b) under the right of duty and under the protection. As there is an arrangement to prepare and update

the background picture, the background picture has been prepared to reflect the condition of the ward accordingly.

An objective statement (HYSV) is a document that contains details of basic facts, indicators or baseline of a place, area, population, geographical location, social characteristics, natural resources, economic status, state of development, etc. Object details are also called "background" in Nepali. Although the term HSV is used to analyze the properties of different objects in the fields of geography, engineering, medicine, etc., it is a description of obtaining, analyzing and presenting data about an administrative or geographical area.

In the current context of Nepal, the local level is the local government. It provides services to the people at the local level. In the Local Government Operation Act 2074, the local levels have to prepare the material details of their Municipality and Municipality and select the plan on the basis of that. Information should be collected and analyzed for the preparation of objective details. By keeping the collected information in a realistic manner and preparing objective details, it will be of great help to conduct development activities from the local level and other stakeholders.

A fact or detail about any person, organization, event, process or thing is generally called information. Based on the collection, there are two types - primary information and secondary information. The primary information is collected by going to the respective area itself while the information collected by others is called secondary information. All the activities from collecting, processing (scheduling, interpreting or analyzing) and publishing this information are under information management. Information is managed with the objective of getting the required amount of information as and when required. Organized information should be able to be extracted and used as needed. Giving all or unnecessary amount of information without managing it is likely to omit or obscure the main topic. Therefore, information must be managed. In the context of the increasing role of the local level in the development of the Municipality and the flow of public services, the management of development information in the Municipality is an important task to be done by the municipality. At present, the Ministry has prepared a clear blueprint for the preparation of material details for all the village municipalities and municipalities of Nepal and sent it to all the local levels. No plan can be chosen without the facts and information of the real situation of various parties. Therefore, by setting priorities on the basis of objective details, the background also helps to run programs based on real needs and desires of the people and also to prepare for the future.

2.2 Main objectives of the study:

Overall, the main objective of this study is to identify the situation of Godawari Municipality. By analyzing various economic, social, material, geographical and other conditions related to Godawari Municipality, it is assisting in local level policy formulation, planning, implementation and monitoring evaluation. The specific objectives of this city profile are as follows.

- To analyze the existing condition of the community in terms of development including geographical, administrative, social, economic, cultural, natural, religious, historical and infrastructure.
- To assist in the selection and distribution of long term plans and policies of the Municipality including plans and programs.
- To create an environment of mutual cooperation as it will be easier to develop relations with various bodies and individuals through information.
- To prepare documents as a material to inform the researchers, planners, organizations and people interested in the development of the Municipality about the important areas, possibilities and problems.

2.3 Study / Structure Method:

While preparing the objective details of the municipality, especially based on the household survey, the report has been prepared by surveying the households of all the wards within the municipality. Also, study of material details of former Village Development Committees, study of indicators of Millennium Development Goals and Sustainable Development Goals, study of district information management guidelines, periodical planning guidelines, on-site survey and observation of municipal wards and consultation with experts working in this field.

Various study methods have been used to prepare the background image. In this process, descriptive and analytical styles of social studies analysis including Household Survey 2075, National Census 2068, Information published in the Gazette, District Coordinating Committee Lalitpur, group discussions and interactions have been used. Similarly, sources of published and unpublished secondary information available at the local level, reports of various organizations including the use of geographical information system, study and analysis will reflect the condition of the entire municipality.

2.4 Importance of study / structure:

It is necessary to identify the real situation and needs of the local level in order to make the fruits of development available to the people and to create an environment that can be used by all sections. In today's age of globalization, it is necessary to have an objective and analytical study of the field concerned in order to move forward the processes of proportional development in a timely manner. This study will be of special importance in identifying the real situation of the area concerned, formulating future development plans and strategies and conducting various development activities. In addition to this, the importance of this study is wide as the presented background will be useful to the concerned organizations and researchers, planners, development thinkers, social workers and other inquisitive dignitaries.

2.5 Limitations of the study:

Although a theoretical study has been done on various subject areas obtained in the process of preparing the framework for the preparation of the objective description of the municipality, it may be necessary to improve it as it is yet to be tested in the relevant field. Similarly, geographically, socially, religiously, culturally, economically, naturally, etc., may not cover all aspects of the area, while some of the mentioned forms may not be used in the municipality. However, as the field of study of profile is wide, the purpose of the study has been taken as the main field. Due to the limitations of means, resources, time, cost, information and other things, any study is bound within certain limits.

2.6 Introduction to Municipalities

2.6.1 Geographical and Political Structure:

Godawari is a municipality in Lalitpur District in Province no 3 of Nepal that was established on 2 December 2014 by merging the former Village Development Committees Old Godawari, Badikhel, Bishankhunarayan, Godamchaur and Thaiba. The municipality area was again expanded in March 2017 to include in total 12 previous VDCs. The six VDCs added were Devichaur, Dukuchhap, Chhampi, Thecho, Chapagaun, Jharuwarasi and Lele. The center of this rural municipality is located at Bajrabarahi. It is one of the popular hiking destinations in Nepal for its rich wildlife and splendid environment. Godawari is also famous for its botanical garden. "Phulchowki" is located in Godawari which is the highest peak in Kathmandu valley.

2.6.2 Historical Status:

Godawari is a Municipality located in Lalitpur district. Due to the diversity of geography, climate, forests, rivers, lifestyles, costumes, etc. of different castes, this Municipality has a special significance. The original slogan of this Municipality is "Our program is our policy, Godawari's prosperity". An important region from the point of view of domestic tourism and nationality, 10 km east of the Kathmandu ring road, this region is considered to be unique in terms of biodiversity and diversity. At the same time, beautiful parks, clean weather and beauty are the attractions here. Godawari is also important from religious and mythological point of view. This region is also a new destination for Nepali tourism. Another feature of Godawari is the mythological and spiritual side. Godawari Kund and Naudhara temples are additional features here. Every Saturday, local youths gather at the temple of the ever-flowing Naudhara Devi, especially during the Dashain. Godawari temple and the tank here is another feature of Godawari. The Godawari fair is famous all over the country as a 12-year-old fair.

The place where the statue of Buddha can be seen on the hill after going east from Lalitpur Satdobato is really enjoyable. The Buddha statue complex in favorable climate and peaceful environment has been named as Shantivan. Familiar with the new philosophy. Yogi Bibekananda's Manokranti Matrix is another special place of Godawari. The number of people going to the Matrix Hospital for treatment is the same, while the number of people going to listen to Yogi Vikashananda's discourse and meditate on Saturday is also increasing. Apart from ordinary Nepalis, Godawari is a suitable area for upper castes. At present, the popular Godawari is likely to be more beautiful and supernatural if it moves forward with a good plan. Cycling officials also agree that Badikhel Ley's track from Godawari could be the best track in Asia. The construction of the proposed Godawari Phulchoki cable car has further enhanced the attractiveness of the region. Whether it is summer or winter, living here has its own characteristics. When you reach Godawari forest to avoid the heat, the cool breeze blows here and you can enjoy the fog in winter. This Municipality is considered to be the rainiest Municipality among the municipalities and villages across the valley. Due to its water resources, Godawari is supernatural in its natural beauty and prosperity.

2.6.3 Religious, tourist and historical sites

Located in the west-south direction of the capital, this Municipality also has the potential to be developed as a religious, natural and tourist destination. There is no doubt that the highest and rapid development of this Municipality will take place if the existing natural, religious and social heritages in this area can be developed as a tourist destination of the municipality. Godawari Kund, Godawari Naudhara, Vishankhunarayan, Leleko Saraswati Kund, Tileshwordham, Tikabhaurav, Santaneshwar Mahadev of Jharuvarasi, Bajravarahi Temple of Chapagaun, Shwet Warahi, Godawari Phulchoki, Lele Mankamari,

Thele Mankamana, Thele Devi Temple, Thecho's Brahmayani Temple presents the ancient religious and cultural traditions and religious identity of this city.

2.6.4 Main festivals and fairs celebrated in the municipality

As in other parts of the country, the residents of this Municipality also observe national festivals as well as festivals and ceremonies of their particular caste and religion. In this municipality, caste-specific festivals are celebrated in different ways in every religion. Traditionally celebrated festivals include Dashai, Tihar, Haritalika Tij, Ram Navami, Shivaratri, Phagupunrama, Buddhapurnima, Nag Panchami, Maghe Sankranti, Saune Sankranti, Krishna Janmashtami, Chaite Dashai, Harishyani Ekadashi, Harivodhani Ekadashi and others. Puja, Sithi Nakha, Yamori Punhi, Gathe Mangal, Lhosar, Sama Chakewa etc. are celebrated in special castes. In particular, the main fairs and fairs of this Municipality are Jatire, Indrajatra, Gaijatra, Ghodejatra etc.

2.6.5 Possibilities, opportunities, challenges and problems in the municipality

Godawari Municipality is geographically located at 8, 9, 12 and 14 of the city. With Ward Lalitpur Municipal Corporation and Ward no. 1 and 2 are connected to the border of Mahalakshmi municipality. Similarly, Vada no. 5, 6 and 7 Bagmati and Konjyosom is a Municipality full of religious, cultural, historical and tourist sites. The Municipality is dominated by Newar, Chhetri and Brahmin castes and is also inhabited by people of other mixed castes. The potentials, opportunities, challenges and problems in Godawari Municipality are shown below.

2.6.6 Possibilities, opportunities, challenges and problems of agriculture in the municipality

Climate and soil fertility have increased and the use of some new technologies in agriculture has increased the attraction of the people here towards the agricultural profession. If we can increase production by modernizing agriculture as well as using advanced vision, there is a possibility of not having to depend on employment and food supply. Looking at agriculture, if the current commercial vegetable farming can be made more effective, it will not take long to raise the living standards of low-income people within the municipal area.

2.6.7 Opportunities, challenges and problems of trade and business in the municipality

Most of the people living in the area are attracted to agriculture and trade. There is no shortage of markets for doing business. As the population density is high in this region, trade and business is also flourishing. The people here are found running their own business. Some of the people in this Municipality have run small scale industries from their own resources while many others are involved in other

professions and businesses. In order to generate money through trade and business as well as effective flow of people-oriented services, it has become inevitable for the Municipality to take initiative for systematic market management. Some of the people in this Municipality are employed in government or non-government jobs while some have gone abroad. The main sources of income of the people of this Municipality are agriculture, business, government jobs, non-government jobs, foreign employment, wages, pensions, etc. Most of the traders in Godawari are local and there are strong possibilities and opportunities in the trade and business. Similarly, there is ample possibility of establishing domestic, small and big industries in this Municipality in the future. There is no shortage of market for the sale of household goods in this municipality. In view of the increasing demand for products based on local SIP and technology, it seems that quality goods are finding a good place in this place. Chapagaun, Lele, Thaiv, Thecho, Godawari Champi etc. are the main markets of this municipality. Therefore, the potential for trade here seems to be the same.

2.6.8 Possibilities, opportunities, challenges and problems of tourism development in the municipality

Another major potential in Godawari Municipality is tourism promotion. The Vajravarahi Temple and the Saraswati Temple in Lele, which are considered to be religiously important, have the potential to increase the economic and internal revenue of the place by further highlighting the tourist potential of the place. While developing as a tourism sector, the issue of extreme encroachment on the environment has been raised in public. Today's urgent need is to carry out development works in the spirit of sustainable development while carrying out development works so that development does not take the form of destruction. Similarly, looking at the transport facilities, there are no road problems in this Municipality as there are road facilities in this area as well as in rural areas. Most of the places in this Municipality are being operated by Whams means of transportation. Through which the arrival of tourists has been made easy, simple and successful. If everyone can contribute to the transformation of the Municipality into a tourist city by realizing their capacity and responsibility, there will be opportunities and strong potential for all-round development of the municipality.

2.6.9 Possibilities, opportunities and challenges of the cultural side in the municipality

Nepal is a multi-ethnic, multi-lingual, multi-cultural and multi-religious democracy. Comparing this context with Godawari municipality, this Municipality is also inhabited by people of many castes and languages and is found to be culturally diverse. According to their caste, they have respect for each other's religion and culture even though they have rituals, customs, values and beliefs. There is a race for conversion in Nepal at present. Some elements have played an active role in fulfilling their vested interests by

converting to another religion in economic temptation. At the same time, the fascination with foreign culture is rapidly attacking religion and culture. For this too, there is a need to juggle culture. Overall, the infrastructure of higher education in this Municipality is low and it is seen that people go to Lalitpur, Kathmandu, Bhaktapur, Pokhara, Hetauda, Bharatpur, India and third countries for higher education. In addition to this, looking at the educational activities of this place, it is seen that the children of low income families study in government schools while the children of economically prosperous families study in private schools and colleges. There is no doubt that if the quality of government schools in this place can be improved, children of all classes can be included.

2.6.10 Inter-municipal relations

The inter-relationship of Godawari Municipality is more with Kathmandu, especially the neighboring municipalities. People here go to various places in the district and Kathmandu, including the local markets within the municipality, for daily employment and other transactions. It is seen that the local market of this Municipality is located in the neighboring Municipality and Kathmandu for the sale and distribution of goods produced in this place. Similarly, health institutions within the municipality, Kathmandu, Lalitpur, Bhaktapur and third countries including India are also visited to get health services. It has been seen that marital relations are maintained within the Municipality as well as in other outlying districts. Similarly, when it comes to markets, there are markets within the Municipality including Kathmandu, Lalitpur and Bhaktapur. In terms of education, the people of this place use the educational institutions within the Municipality as well as get higher education from Kathmandu, Chitwan, Hetauda, Janakpur, Dharan, India and other third countries. Similarly, for entertainment, one can visit the parks within the municipality, Lalitpur, Kathmandu and various scenic places of Nepal.

2.6.11 Mobility of the municipality

Analyzing the dynamics of the people of this municipality, it is seen that the pillars of education, health / medicine, employment and trade are from the places within their own Municipality to the neighboring districts and overseas. Kathmandu, Hetauda, Chitwan, Birgunj, and various places in India are the main places for people to go for employment, trade, education, health care and other purposes.

2.6.12 Seasonal Calendar

The main occupation of the people living in Godawari Municipality is agriculture and trade. Therefore, the people living in this Municipality have been doing agriculture and trade according to the weather. The following seasonal calendar has been prepared for the convenience of the farmers engaged in agriculture.

2.6.13 Social mobilization

In today's changing age, for the development of the society, the participation of one person and one family alone cannot move forward in the development as the society wants. One person's perceptions, thoughts and ideas and the decisions made by many people will definitely make a difference. Today, various non-governmental organizations and international organizations are actively working to move forward in a sustainable manner by forming groups with the idea that a clean society can be built only if every nation participates in the development of the society. For the overall development of the community in Godawari Municipality, local and other organizations such as mothers' groups, youth clubs, savings groups and various other organizations have been working through social mobilization and taking special initiatives to spread social, economic and public awareness of the municipality. Social workers are also playing an important role for social mobilization and public awareness.

Chapter 3: Introduction to Dashboard

3.1 Dashboard content

When the user log into the dash board site of Godawari Municipality they will be able to view main navigation panel on the left hand site containing dashboard, ward list, user list, add user, member data, add house, add place and favorite places as shown in the picture below.

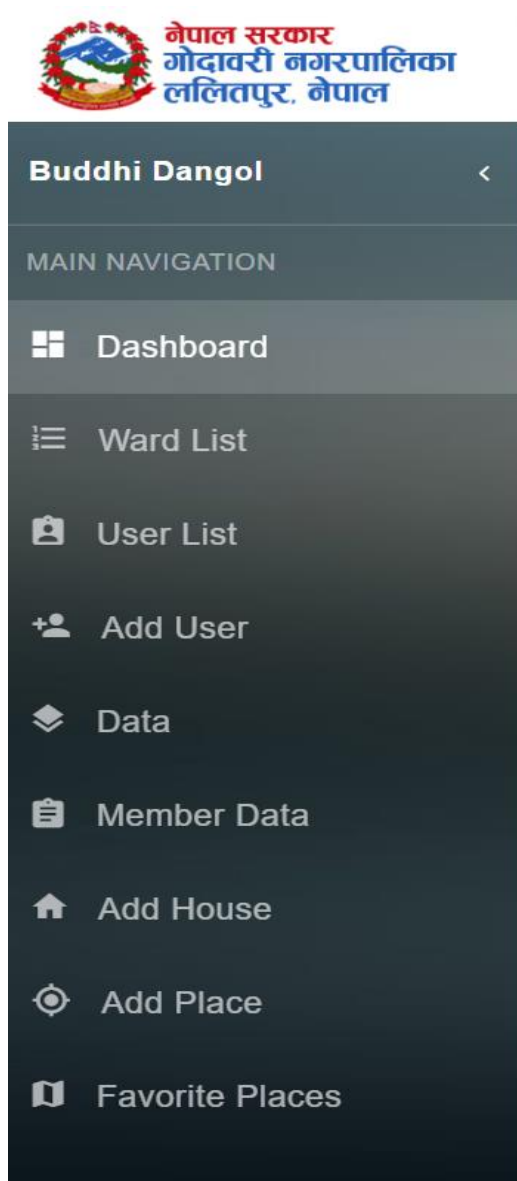

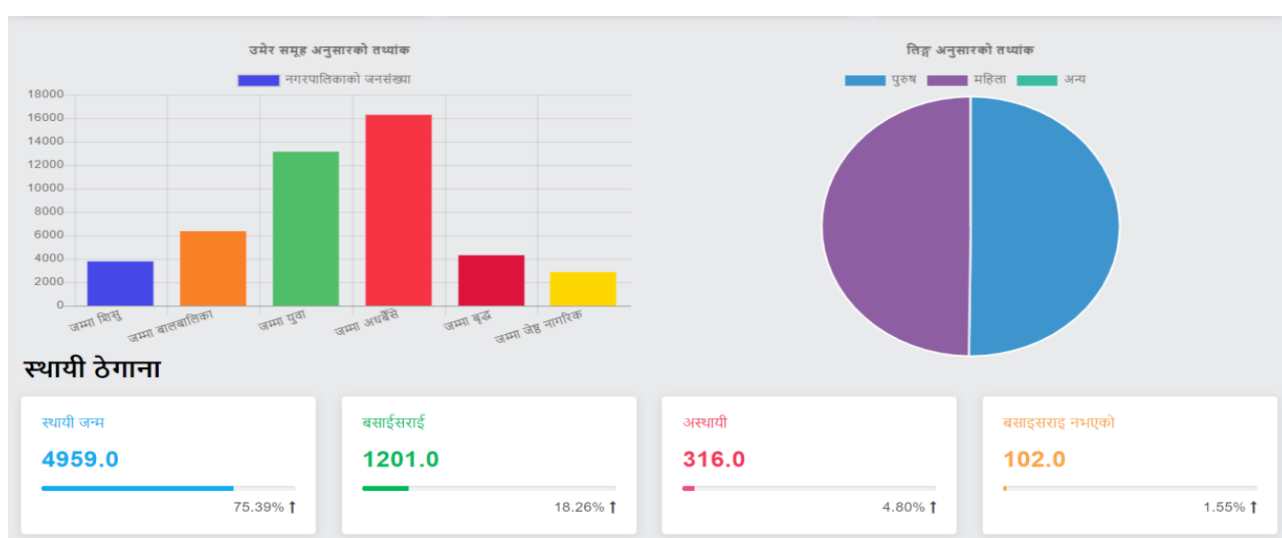

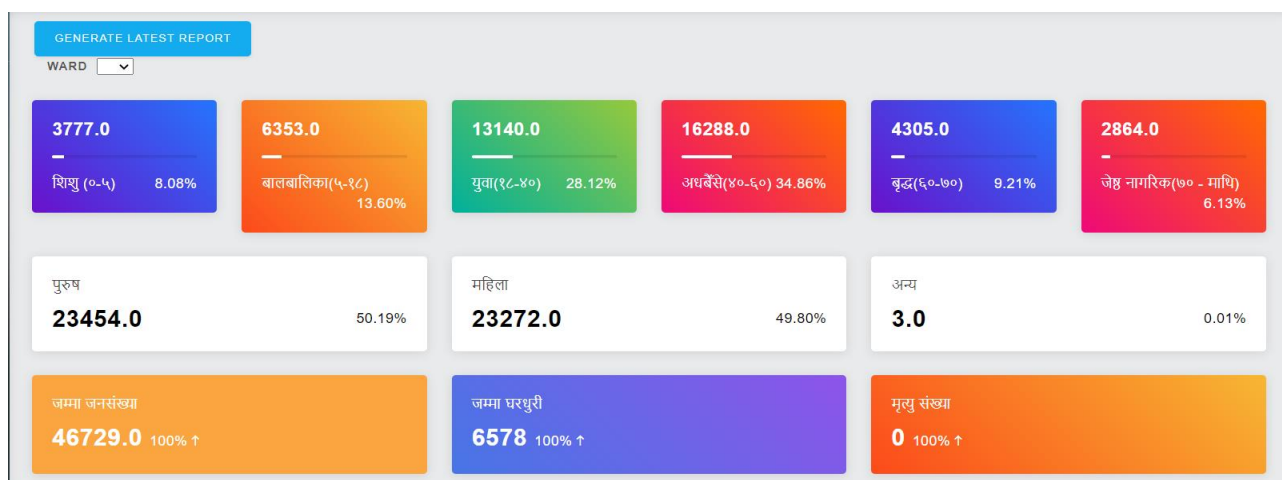

Figure 1: Dashboard Content

3.1.1 Dashboard:

The Dashboard information comprises of information from ward number 10,11, 12 and 13 only. Chapter 4: System Flow Chart

Chapter 5: Population

5.1 Population

The population of Godawari Municipality is 46,729 and has been categorized under various factors such as age, gender, language, ethnicity and caste.

5.1.1 Age

The total population of Godawari Municipality 46729 individuals. As per the survey of 2077 we can find that most of the inhabitants of Godawari Municipality are on their middle age with population of 8408 which is 34.59 % of the total population. Whereas senior citizens are least with population of 1,582 which is 6.51% of the total population as shown in the table below.

Age group	Population (number)	Population (percentage)
Infant	3777	8.08%
Children	6353	13.60%
Youngster	13140	28.12%
Middle Age	16288	34.86%
Old age	4305	9.21%
Senior Citizen	2864	6.13%
Total Population	46729	100%

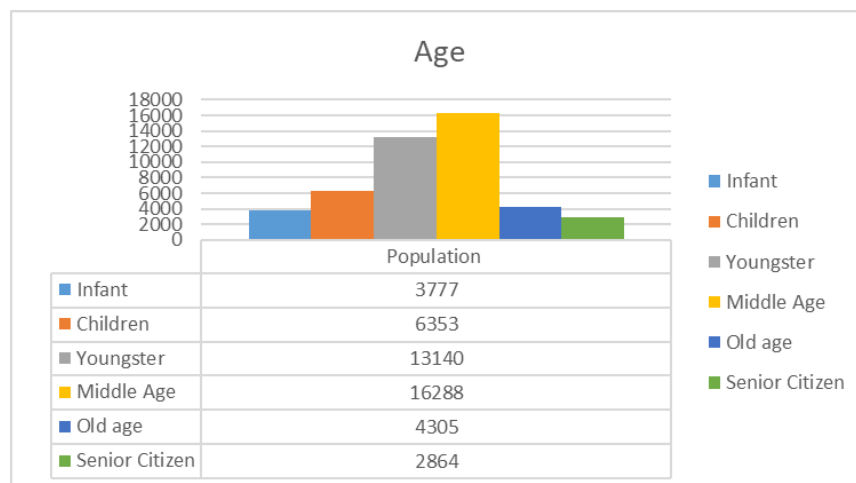

Figure 13: Age

Ward 10: As per the survey we can find that most of the inhabitant of ward number 10 are of middle age whereas least number of habitant are senior citizen as seen in the figure below:

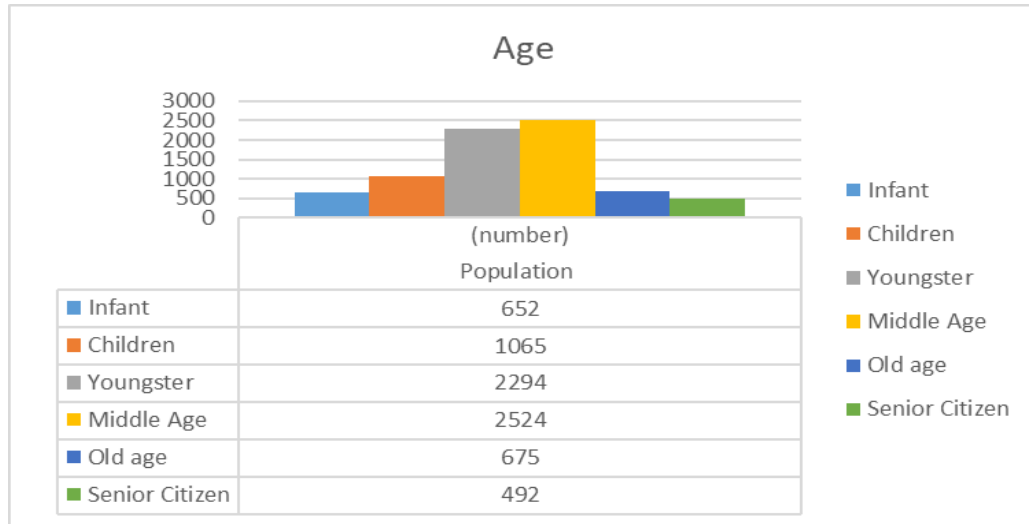

Figure 14: Age Ward no 10

Ward 11: As per the survey we can find that most of the inhabitant of ward number 11 is of middle age where as least number of habitant are senior citizen as seen in the figure below:

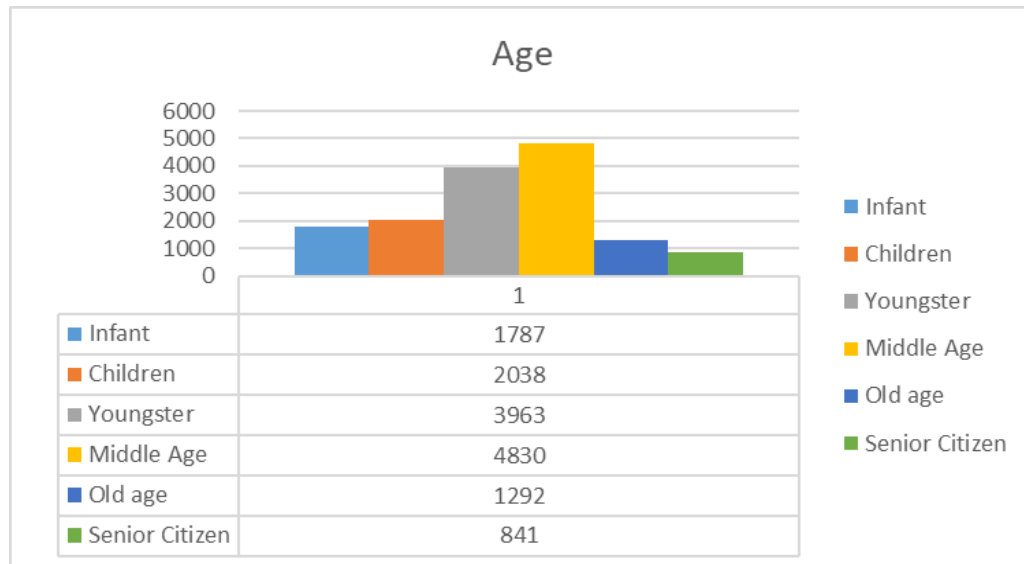

Figure 15: Age Ward no 11

Ward 12: As per the survey we can find that most of the inhabitant of ward number 12 is of middle age where as least number of habitant are infants as seen in the figure below:

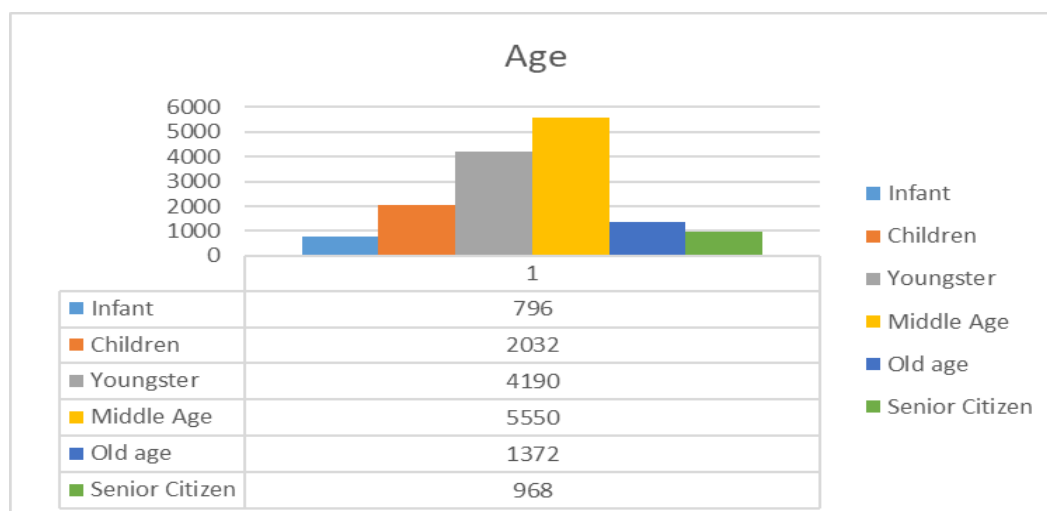

Figure 16: Age Ward no 12

Ward 13: As per the survey we can find that most of the inhabitant of ward number 12 is of middle age where as least number of habitant are infants as seen in the figure below:

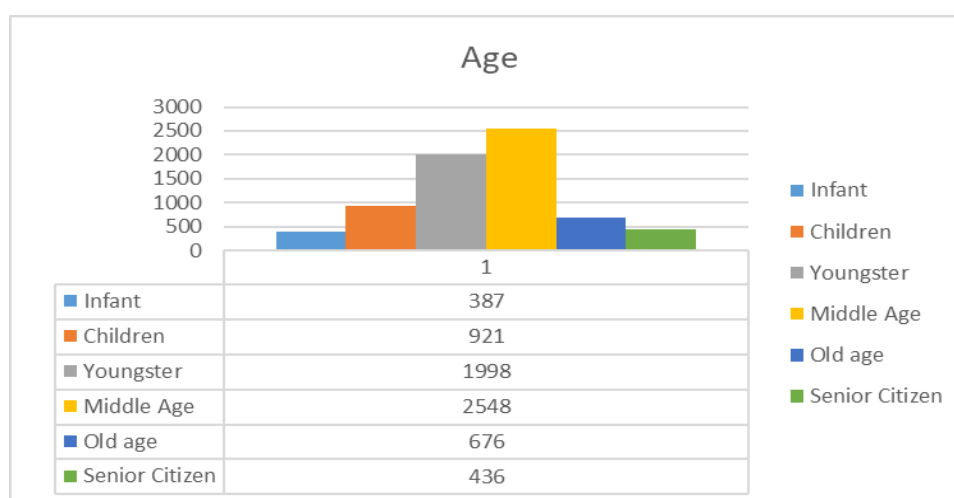

Figure 17: Age Ward no 13

5.1.2 Gender

As per the survey of 2077, among the total population of 46729 individuals we can find that 23272 habitants (49.80%) are female and 23454 (50.19 %) are male and 3 (0.02%) are other as seen the table below.

Gender	Population (number)	Population (percentage)
--------	---------------------	-------------------------

Male	23454	50.19 %
Female	23272	49.80 %
Others	3	0.01 %
Total	46729	50.19 %

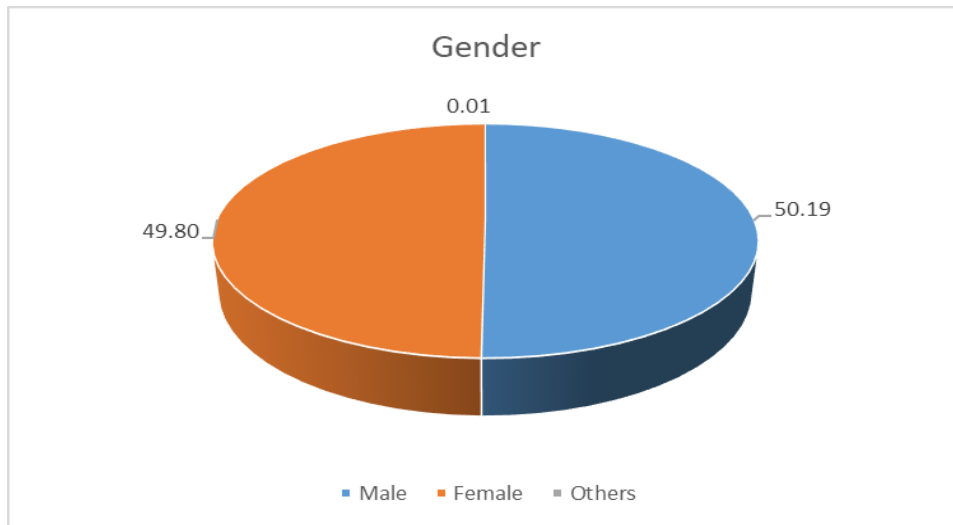

Figure 18: Gender

Ward no 10: As per the survey of 2077 in ward number 10 we can find 49.02 percent of habitant are male and 50.98 percent are female as seen in figure below:

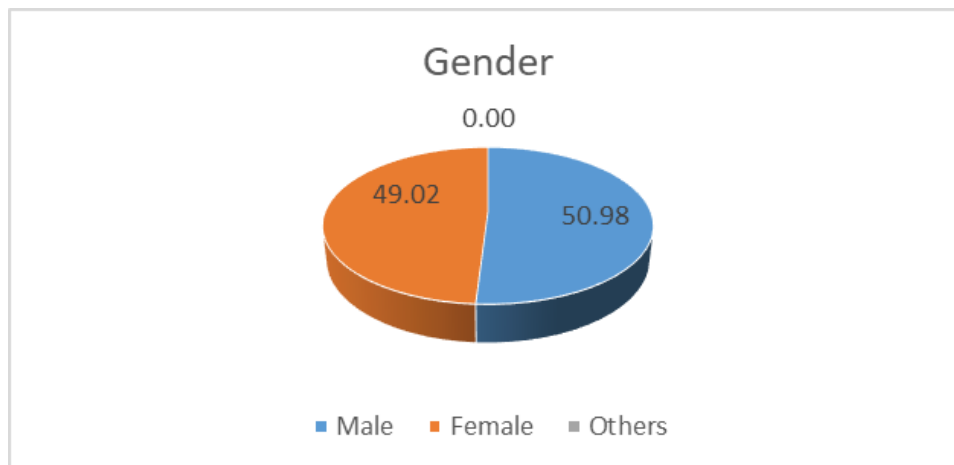

Figure 19: Ward 10 Gender

Ward no 11: As per the survey of 2077 in ward number 11 we can find 50.62 percent of habitant are male, 49.36 percent are female and 0.02 percentage are others as seen in figure below:

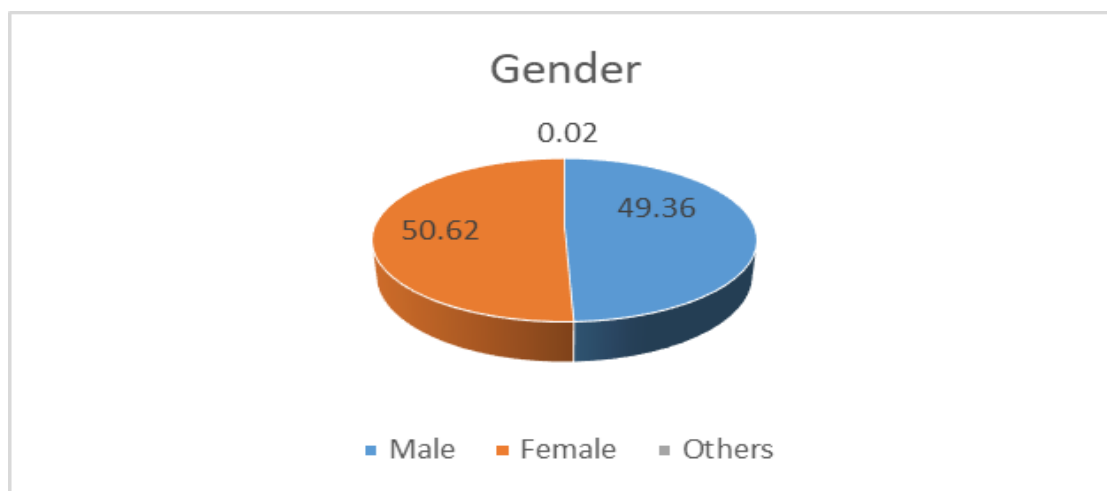

Figure 20: Ward 11 Gender

Ward no 12: As per the survey of 2077 in ward number 12 we can find 50.63 percent of habitant are male and 49.37 percent are female as seen in figure below:

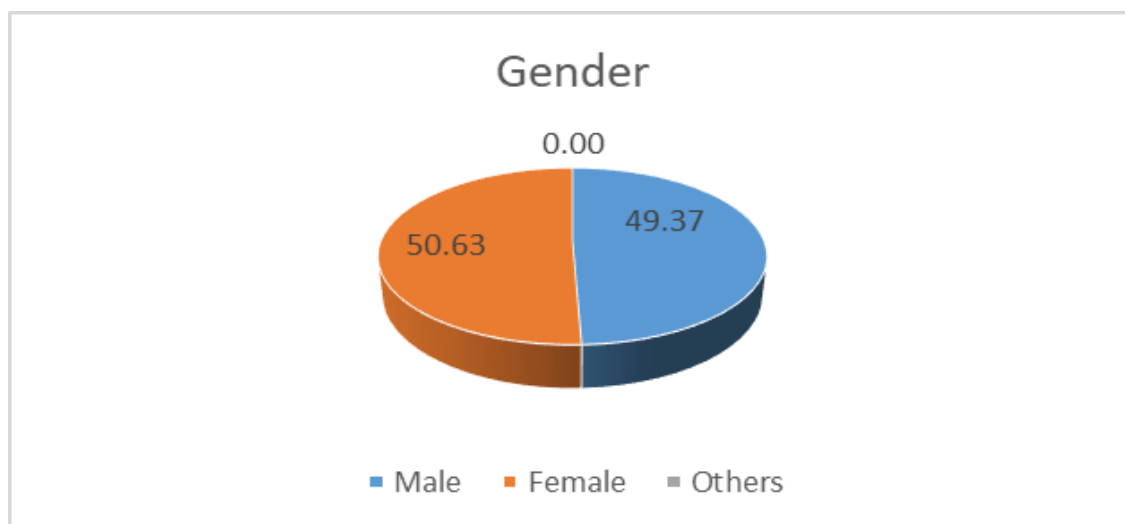

Figure 21: Ward 12 Gender

Ward no 13: As per the survey of 2077 in ward number 13 we can find 48.53 percent of habitant are male and 51.47 percent are female as seen in figure below:

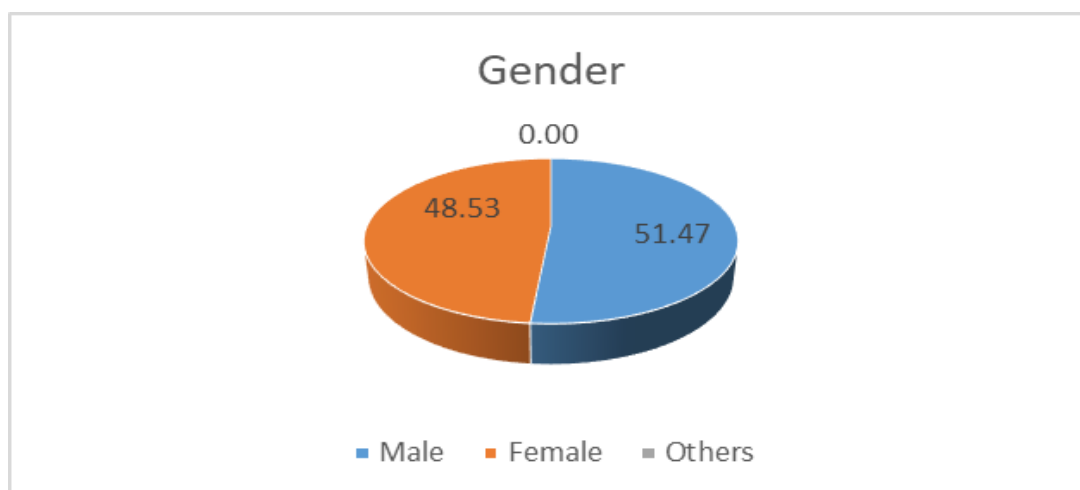

Figure 22: Ward 13 Gender

5.1.3 Language

As per the survey of 2077 we can find that majority of the population can speak Nepali (52.59 %) and Newari (39.27%) while only fewer population can speak other language as seen in the table below.

Language	Population (number)	Population (percentage)
Nepali	3461	52.63%
Maithili	5	0.08%
Bhojpuri	4	0.06%
Tharu	3	0.05%
Tamang	447	6.80%
Newari	2542	38.66%
Magar	81	1.23%
Bajika	0	0.00%
Urdu	0	0.00%
Awadi	4	0.06%
Limbu	7	0.11%
Gurung	7	0.11%
Others	15	0.23%
Total	6576	100%

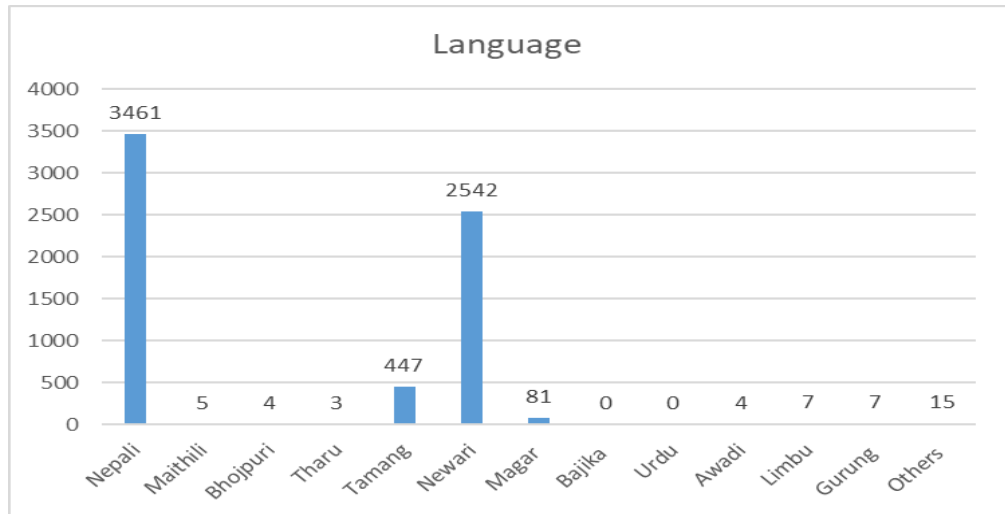

Figure 23: Language

Ward 10: As per the survey of 2077 we can find that majority of individual speak Nepali (966) and tamang (241) language as seen in the figure below:

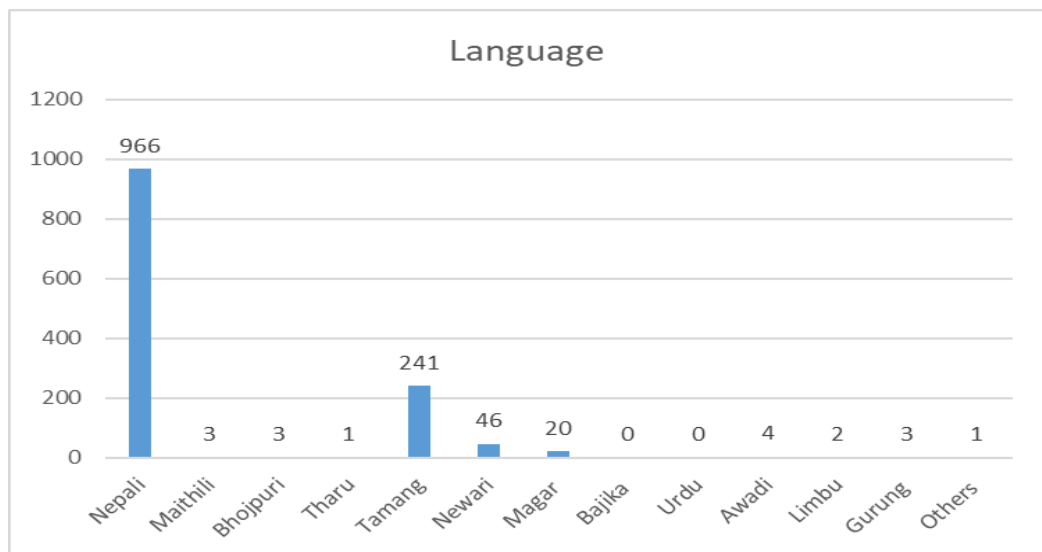

Figure 24: Language Ward 10

Ward 11: As per the survey of 2077 we can find that majority of individual speak Newari language (1290) and Nepali language (619) as seen in the figure below:

Chapter 6: Social

6.1 Social Factor

The population of Godawari Municipality has been classified under social factors such health, education and foreign education.

6.1.1 Health

As per the survey of 2077, health was divided into two group health of boys under 18 years and health of girls under 18 years as seen below:

6.1.1.1 Health of Boy under 18 years

As per the survey of 2077, among the total population 6553 boy under 18 years old in godawari Municipality doesn't have any health problem whereas only few children suffers from physical or mental health issues as shown in figure below.

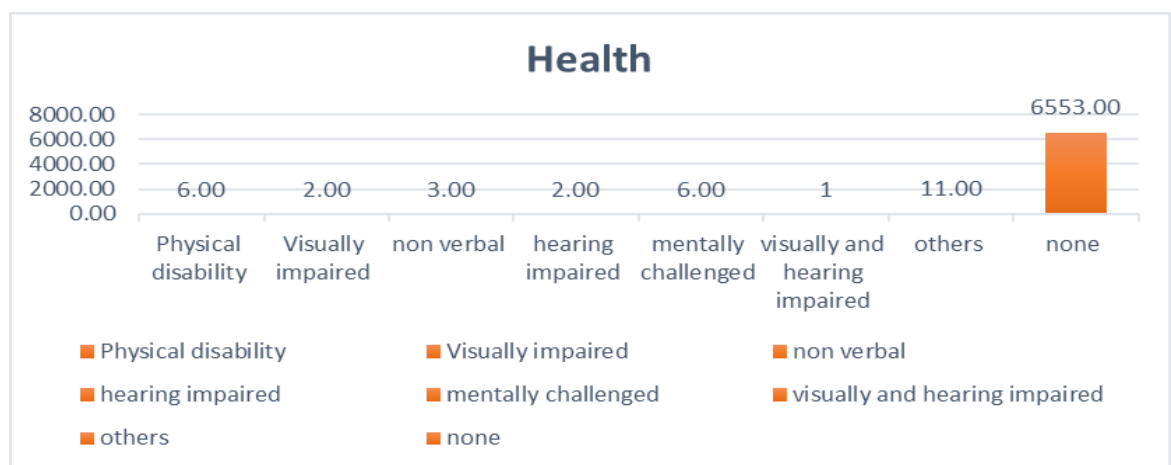

Figure 38: Health of boy under 18 years

Ward 10: As per the survey of 2077, we can see that 1282 boys under 18 don't have any health issues in ward number 10 where as some have health issues as seen in figure below:

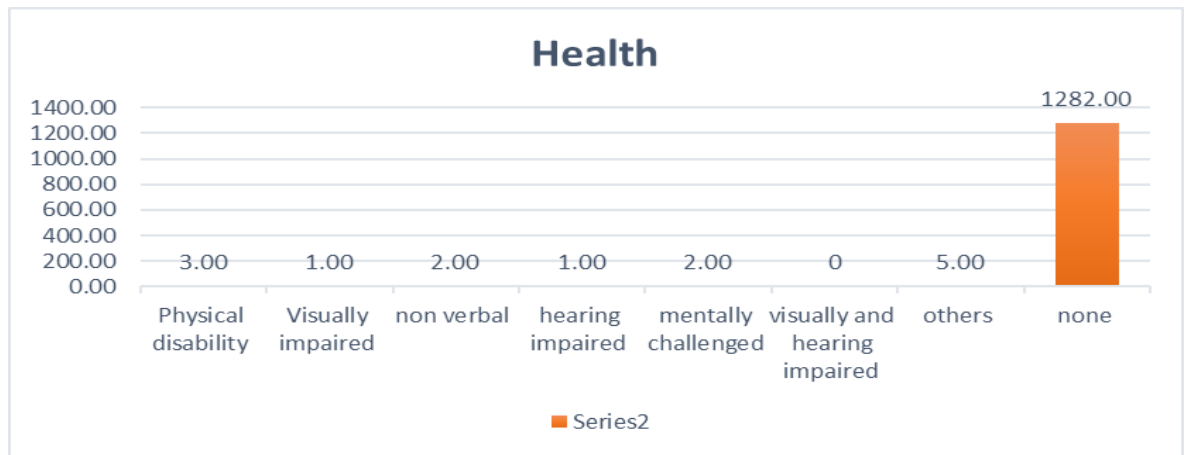

Figure 39: Ward 10 Health of boy under 18 years

Ward 11: As per the survey of 2077, we can see that 2021 boys under 18 doesn't have any health issues in ward number 11 where as some are physically and mentally disable as seen in figure below:

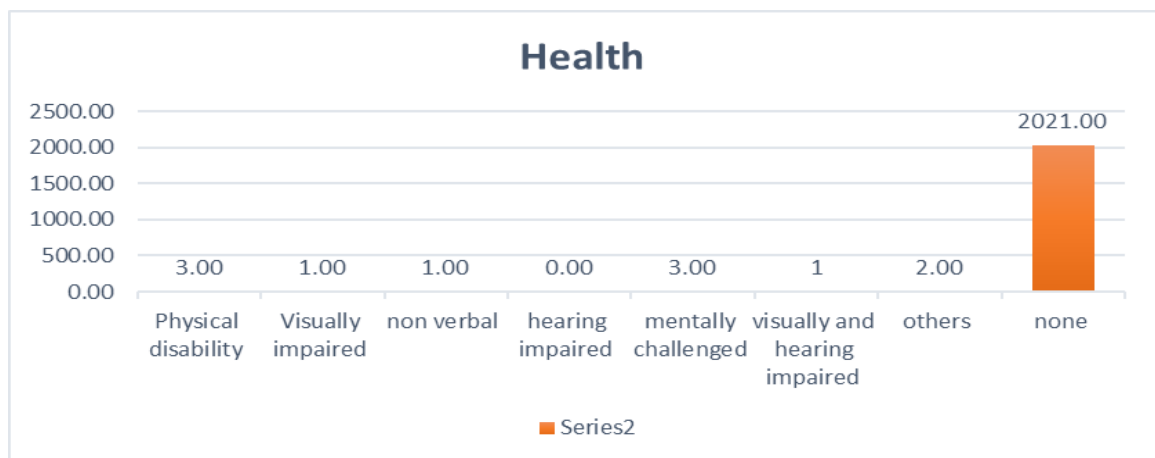

Figure 40: Ward 11 Health of boy under 18 years

Ward 12: As per the survey of 2077, we can see that 2217 boys under 18 doesn't have any health issues in ward number 12 where as some are physically and mentally disable as seen in figure below:

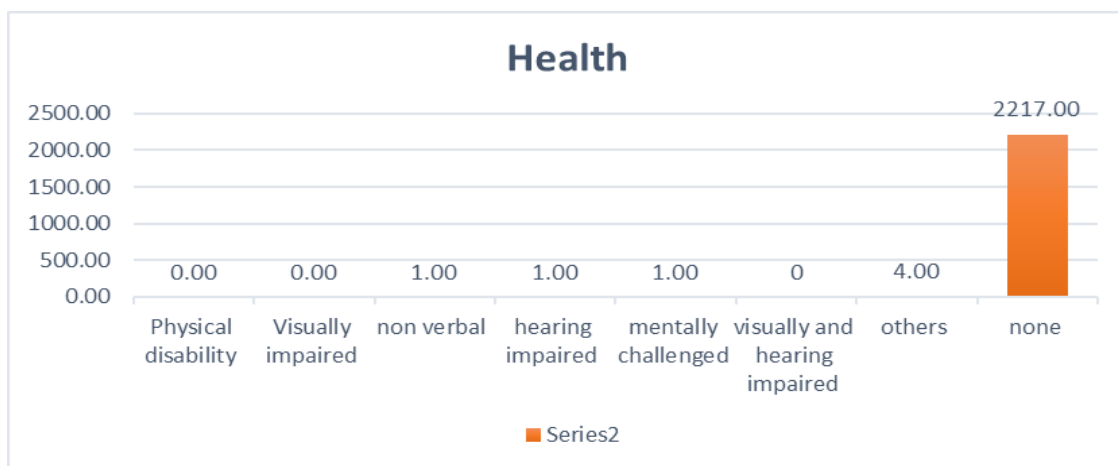

Figure 41: ward 12 Health of boy under 18 years

Ward 13: As per the survey of 2077, we can see that 1033 boys under 18 doesn't have any health issues in ward number 13 where as some are physically and mentally disable as seen in figure below:

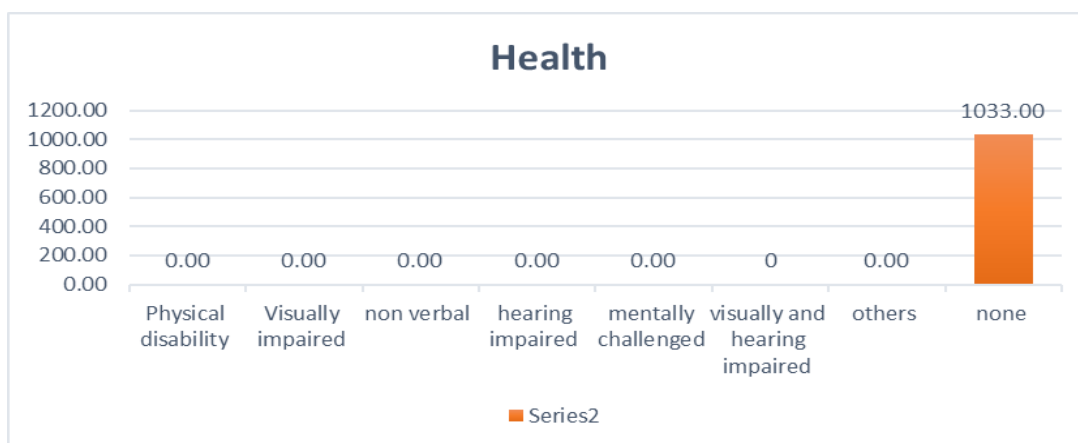

Figure 42: Ward 13 Health of boy under 18 years

6.1.1.2 Health of Girl under 18 years

As per the survey of 2077, among the total population, total of 6553 girls under 18 years old in Godawari Municipality doesn't have any health problem whereas only few children suffers from physical or mental health issues as shown in figure below.

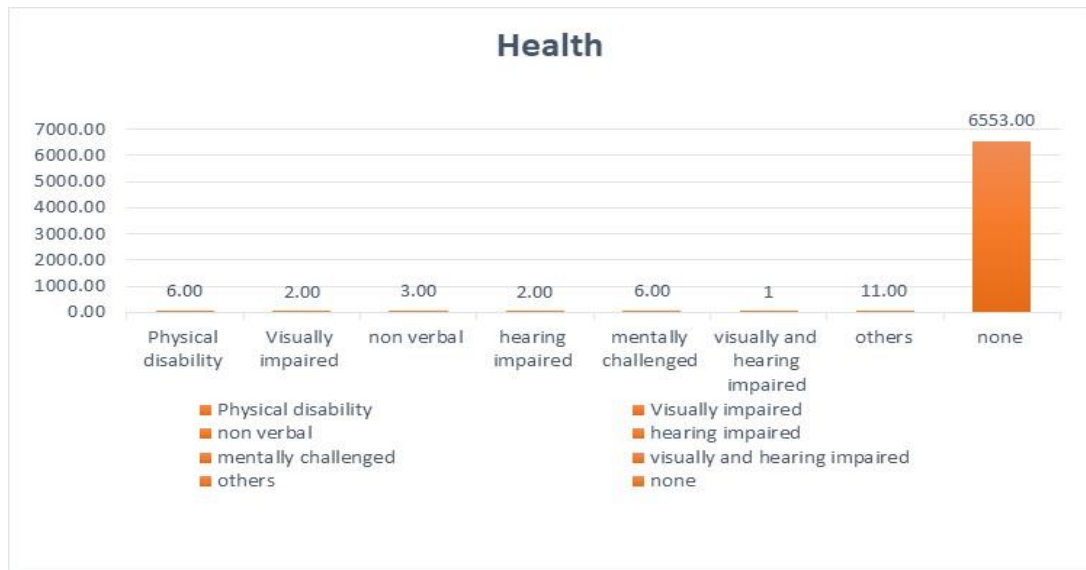

Figure 43: Health of girl under 18 years

Ward 10: As per the survey of 2077, we can see that 1282 girls under 18 doesn't have any health issues in ward number 10 where as some are physically and mentally disable as seen in figure below:

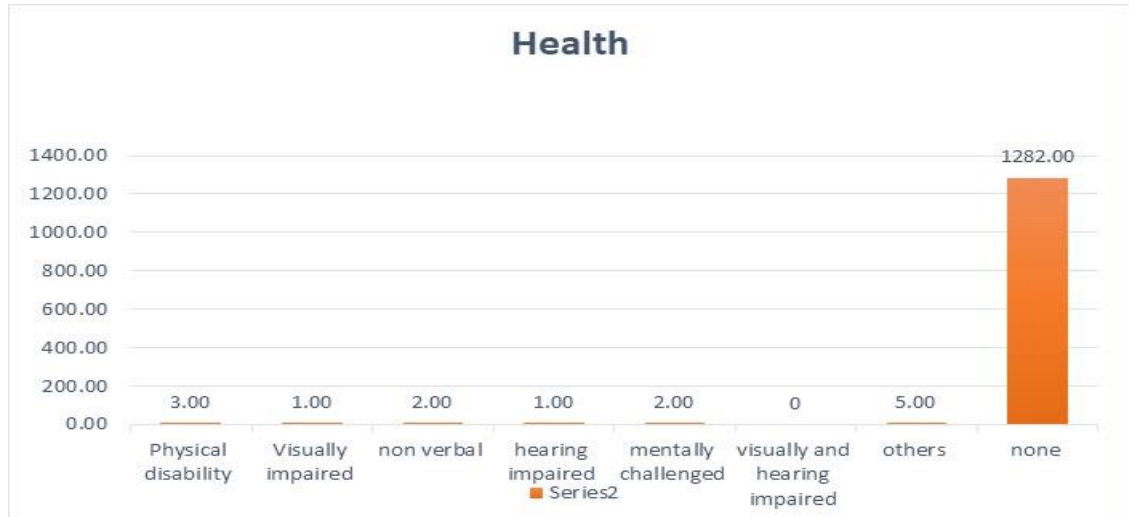

Figure 44: Ward 10 Health of girl under 18 years

Ward 11: As per the survey of 2077, we can see that 2015 girls under 18 doesn't have any health issues in ward number 11 where as some are physically and mentally disable as seen in figure below:

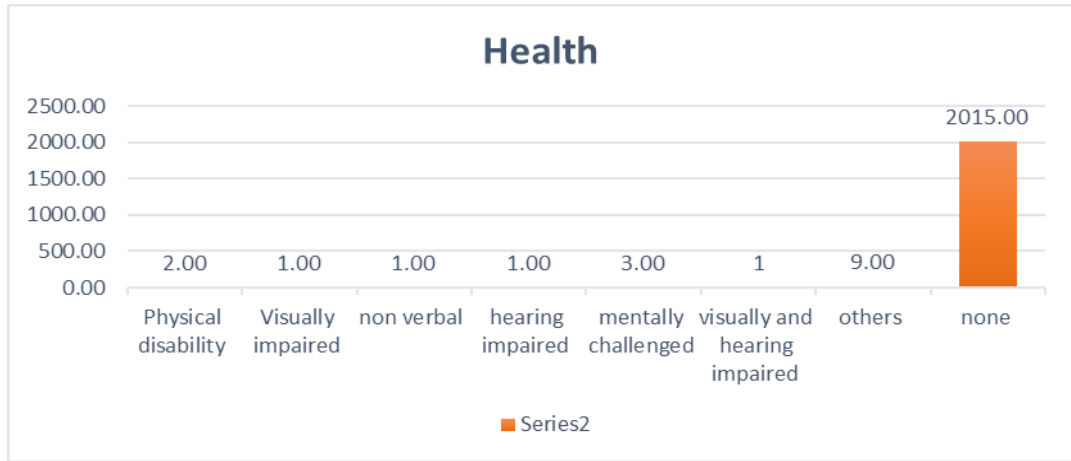

Figure 45: ward 11 Health of girl under 18 years

Ward 12: As per the survey of 2077, we can see that 2210 girls under 18 doesn't have any health issues in ward number 12 where as some are physically and mentally disable as seen in figure below:

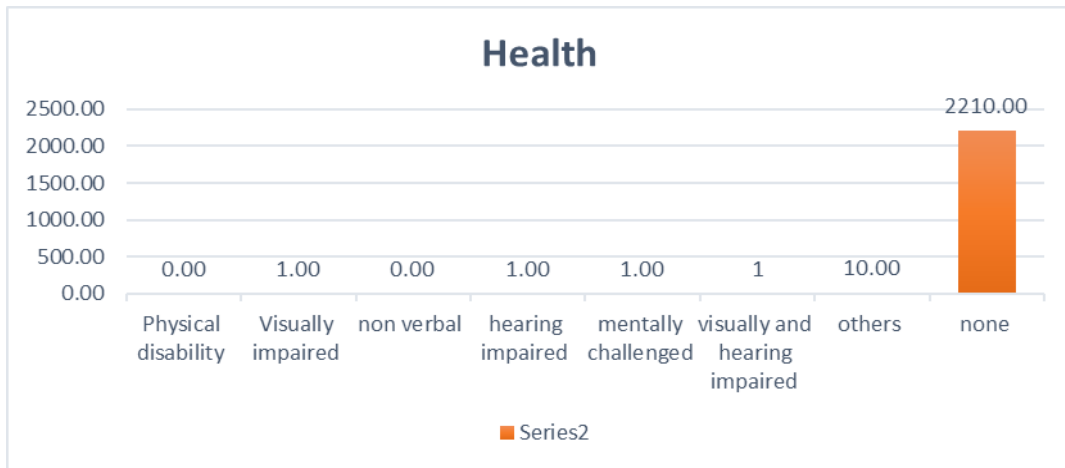

Figure 46: ward 12 Health of girl under 18 years

Ward 13: As per the survey of 2077, we can see that 1029 girls under 18 doesn't have any health issues in ward number 13 where as some are physically and mentally disable as seen in figure below:

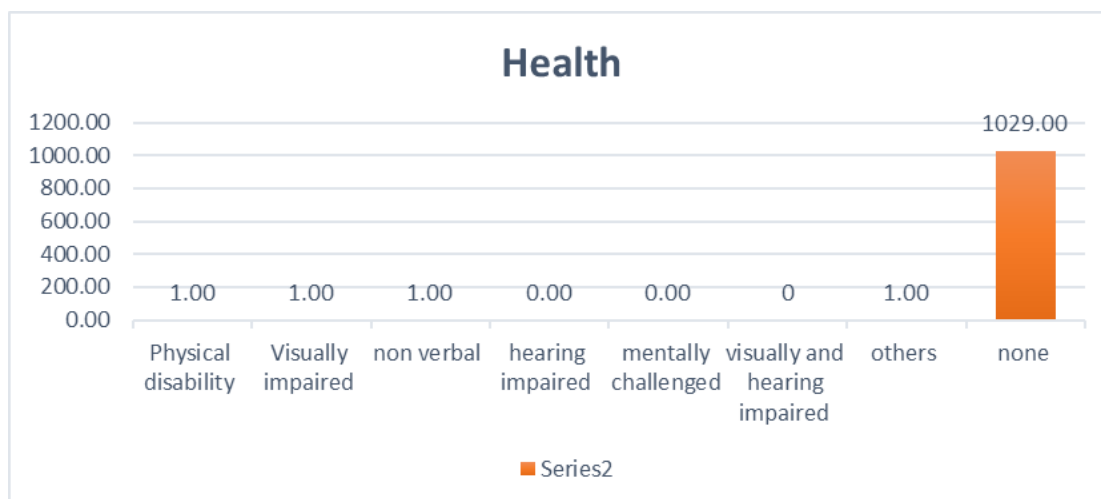

Figure 47: Ward 13 Health of girl under 18 years

6.1.2 Education

As per the survey of 2077 we can find that 8772 (18.78%) of the total population have studied till general education, 7340 (15.71%) have studied till secondary level, 7265 (15.55%) have studied till higher secondary level and 6451 (13.81%) are illiterate. Whereas 11 (0.02%) people have done PHD and 73 (0.16%) have done M Phil as seen in the table below.

Education	Population (number)	Population (percentage)
PHD	11	0.02%
M Phil	73	0.16%
Master	2022	4.33%
Bachelor	5939	12.71%
Higher Secondary School	7265	15.55%
Secondary School	7340	15.71%
Lower Secondary School	3579	7.66%
Primary School	5268	11.28%
General Education	8772	18.78%
Illiterate	6451	13.81%
Total	46720	100%

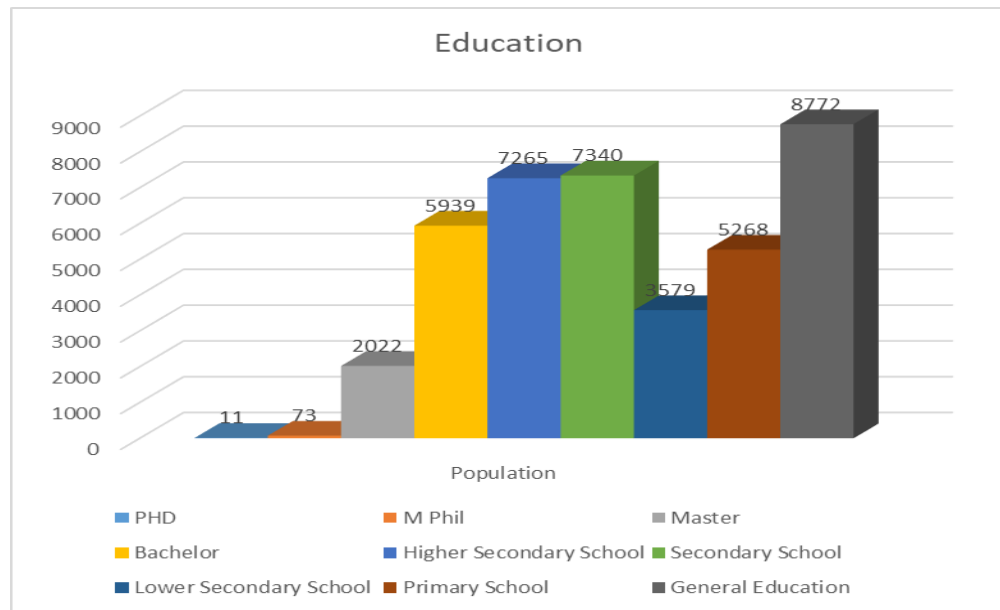

Figure 48: Education

Ward 10: As per the survey 2077 we can see that 1824 have done general education whereas 1 have done PHD and 38 have done M Phil in ward 10 as per the figure below:

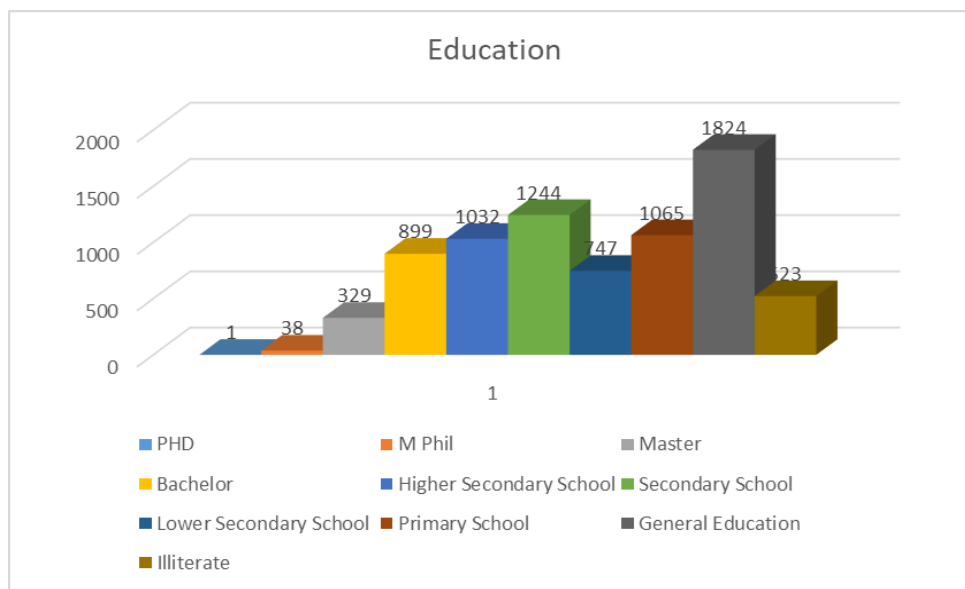

Figure 14: ward 10 Education

Ward 11: As per the survey 2077 we can see that 2809 are illiterate whereas 2304 have done higher secondary school and 1240 have gone to lower secondary school in ward 11 as per the figure below:

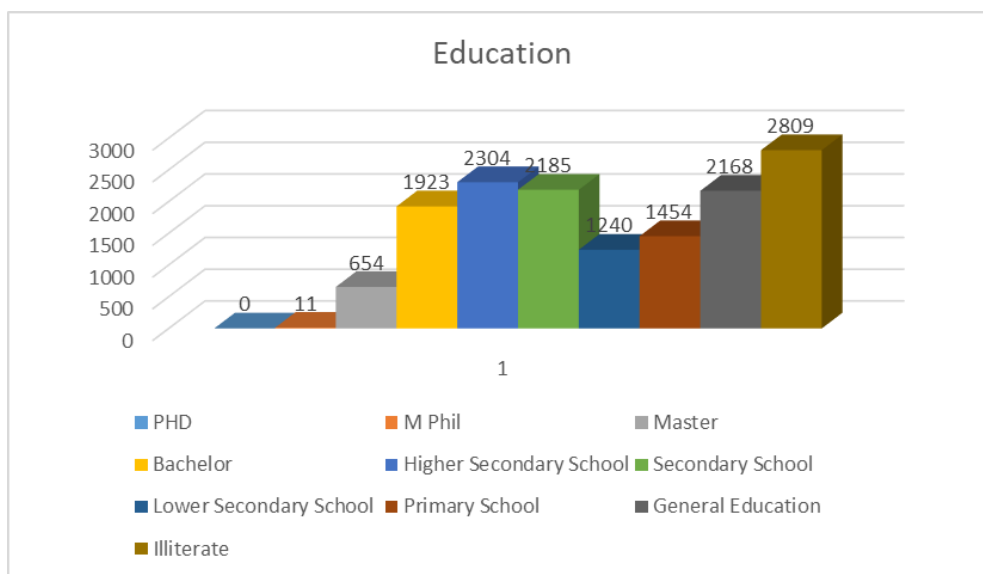

Figure 50: ward 11 Education

Ward 12: We can find that most of the individuals are literate in ward number 12 whereas still 2417 have not gone to school at all as seen in the figure below:

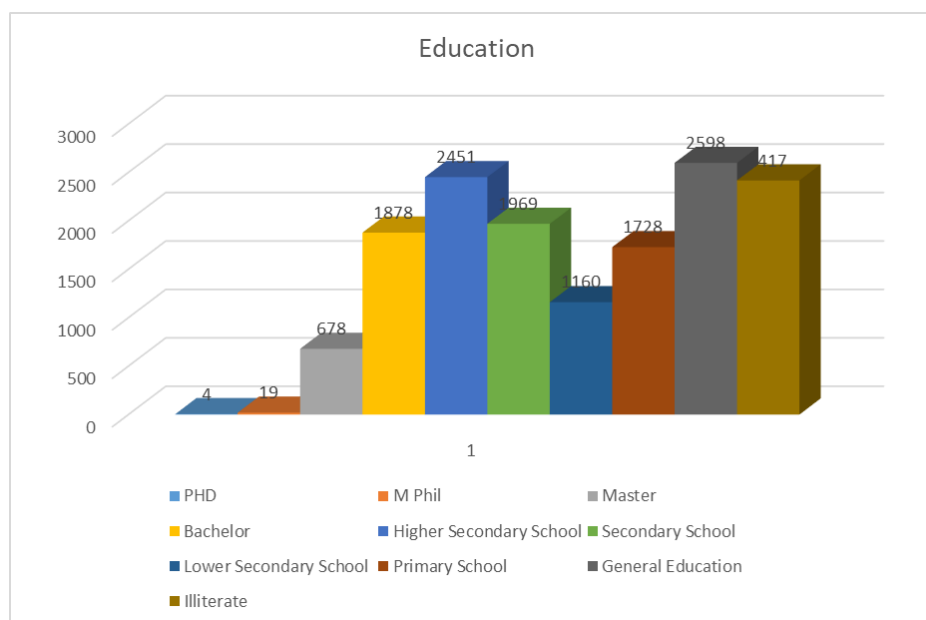

Figure 51: ward 12 Education

Ward 13: We can find that most of the individuals are literate in ward number 13 whereas still some have not gone to school at all as seen in the figure below:

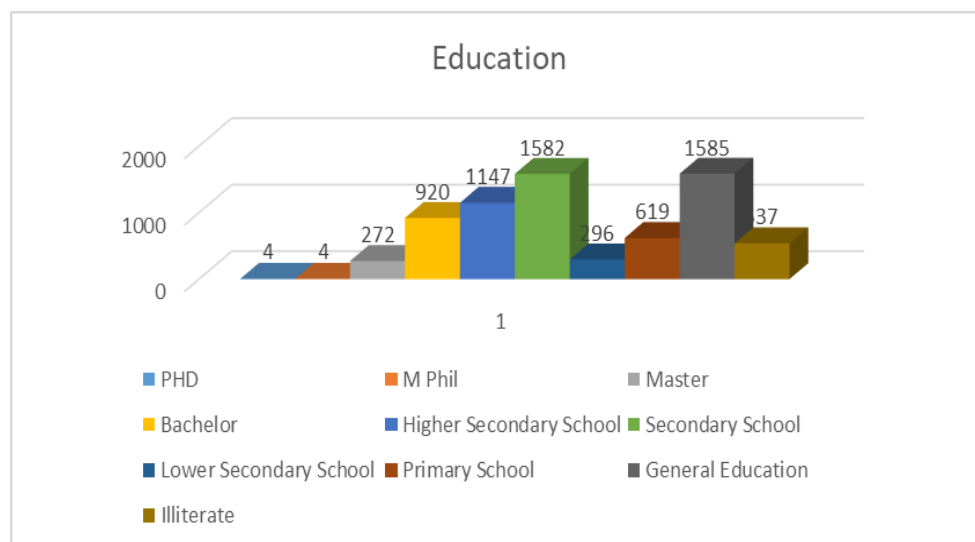

Figure 52: ward 13 Education

6.1.3 Foreign Education

As per the survey of 2077 221 (40.70%) have done their education from Australia, 44 (8.10%) from U.K, 89 (16.39%) from USA and 189 (34.81%) from other countries as shown in the table below.

Country	Population (number)	Population (Percentage)
Australia	221	40.70%
U.K	44	8.10%
USA	89	16.39%
Others	189	34.81%

8.1.4 Famous Landmark

As per the survey we were able to identify 69 temples, 3 parks, 14 ponds, 15 well, 8 monasteries/ statues and 50 schools, 22 institutions and 60 other landmarks as per the table below.

Landmark	Number
Temple	69
Park	3
Pond	14
Well	15
Monastery/ Statue	8
School	50

institution	22
Guthi	0
other	60

Ward 10: As per the survey we can find that there are 10 temples as landmark followed by school, institution, and monastery and well as seen in the table below:

Landmark	Number
Temple	10
Park	0
Pond	0
Well	1
Monastery/ Statue	1
School	11
institution	7
Guthi	0
other	24

Ward 11: As per the survey majority of landmark in ward 21 are temple followed by well and pond as seen in the table below:

Landmark	Number
Temple	21
Park	1
Pond	11
Well	12
Monastery/ Statue	7
School	4

institution	0
Guthi	0
other	7

Ward 12: As per the survey majority of the landmark in ward 12 is temple followed by school, institution, pond and park as seen in the table below:

Landmark	Number
Temple	12
Park	1
Pond	3
Well	0
Monastery/ Statue	0
School	8
institution	6
Guthi	0
other	1

Ward 13: As per the survey majority of landmark in ward 9 is temple followed by institution, school, well and park as seen in the table below:

Landmark	Number
Temple	9
Park	1
Pond	0
Well	2
Monastery/ Statue	0
School	2
institution	3
Guthi	0
other	1

8.1.5 Permanent Address

As per the survey 4959 inhabitant have been born in Godawari Municipality whereas 102 inhabitants does not have any migration document.

Permanent Address	Population	Population
	(number)	(number)
Birth Place	4959	75.39%
Migration	1201	18.26%
Temporary Address	316	4.80%
No Migration Document	102	1.55%

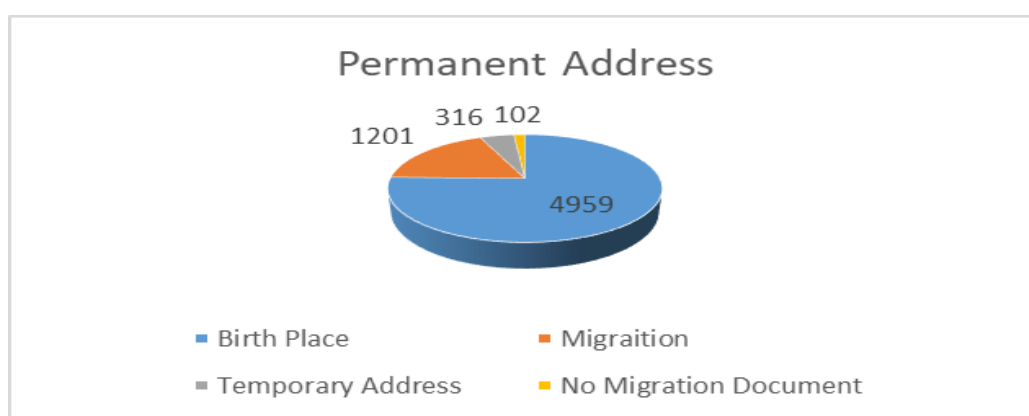

Figure 123: Permanent Address

Ward 10: As per the survey 941 inhabitant were born in ward number 10 whereas 5 inhabitant does not have any migration document.

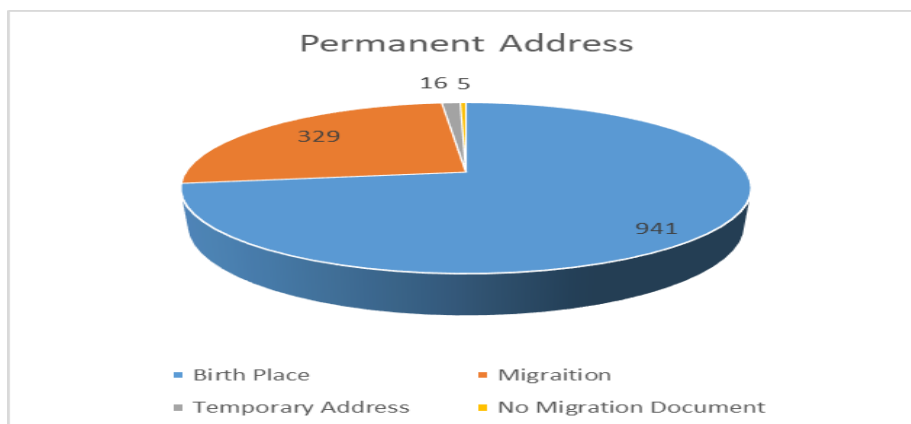

Figure 124: Ward 10 Permanent Address

Ward 11: As per the survey 1501 inhabitant were born in ward number 11 whereas 50 inhabitants does not have any migration document.

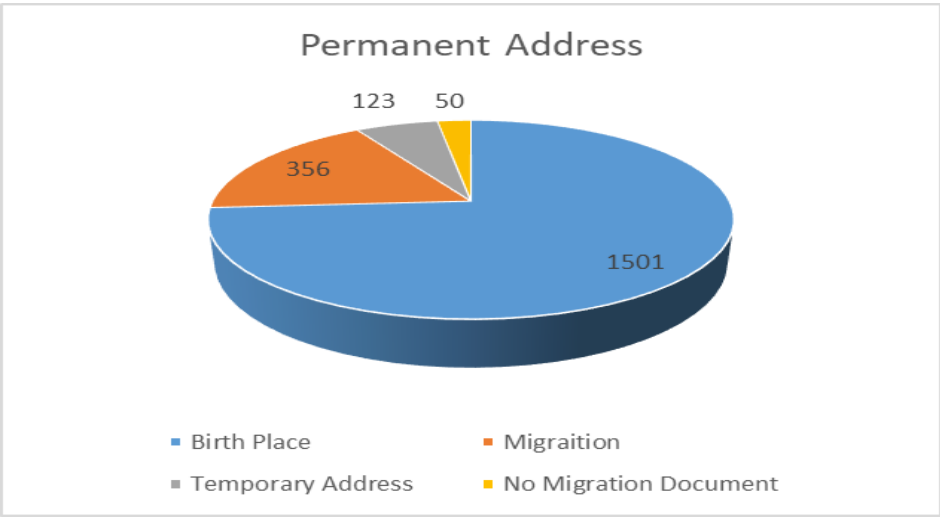

Figure 125: ward 11 Permanent Address

Ward 12: As per the survey 1675 inhabitant were born in ward number 12 whereas 47 inhabitants does not have any migration document.

Term of Reference

GPS based Digital Profile of Godawari Municipality

1. Background

Information System is one of the basic components of development. It provides information of possibilities, opportunity as well as problem of specific area. So, it is very much important for making future development plan. Local Government Operation Act 2074, stated that each local level should identify the resources, analyses the opportunity and problems of the municipality and set up the future vision of the municipality. Reliable information about Demography, Land use, Physical infrastructure, Social, Environmental and Economic condition of the municipality helps to prepare different types of plan and policy. For prioritization of project database is the one of the major requires documents.

This digital database includes Municipality present land use, Demography, Physical infrastructure, Social and Economic condition, available natural and human resources etc. Information is the key for making long term plan of municipality.

In the context stated above, Government of Nepal, Godawari Municipality has initiated for the preparation of Digital Profile. So, Godawari Municipality, Office of Municipal Executive invites proposals from the experienced eligible national consultants/firms who are qualified as per TOR for the preparation of Digital Profile.

2. Study Area

Godawari municipality is located in state no. 3. It was declared as a municipality in 2073 B.S. The former Godawari Municipality, Chhampi and Dukuchhap of Karyabinayak Municipality and Devichour VDC are merged into form Godawari Municipality. The area of this municipality 96.11 sq.km. The municipality is surrounded by Kavre and Konjyosom Rural Municipality in east, Metropolitan Municipality of Kathmandu and Lalitpur Metropolitan Municipality and Mahalaxmi municipality in north and Bagmati Rural Municipality in south. It is situated at 457 meter from sea level to 2831m.

According to the household survey 2074, the total population of the Godawari municipality is 73,045 out of which 36,268 (49.7%) are male population and 36,777 (50.3%) are female

population. The sex ratio of municipality is 1.01 and average family size in municipality is 146.3 persons per sq.km. Godawari Municipality increased population growth rate of 1.07%.

The total household present in Godawari municipality is 15353. Out of them the highest number of household is present in Ward no. 12 having 1,796 household and the lowest number of households is present in Ward no. 12 having 1,796 household and the lowest number of households is present in Ward no. 8 with total of 573 household. Ward 12 is the most facilitated as per household distribution.

3. Objectives of the Study

The main objective of this assignment is to digitalize the detailed-economic data of every single household as well as institution within this municipality so as to facilitate the municipality in decision making, planning and policy development and service delivery. At the end of the assignment, municipality expects the consultant/s to deliver fully developed information to be used by the municipality office and ward offices with data of households, institutions integrated with the GPS location.

Godawari Municipality intends to keep digital records of all households and institutions so as to make the communication with the residents easier and deliver better services in the future to its residents. On the basis of the output, municipality intends to develop a system later to increase the revenue by accurately tracing the tax brackets residents and households fall under and bring all citizens under the tax bracket system.

4. Scope of the work

Conduct socio-economic census of individual households and institutions:

- Use mobile based questionnaire and GPS to collect data from every household and institutions including the photograph and GPS.
- The data to be collected (minimum) will be outlined in the Request for Proposal.
- The questionnaire and the working procedure should be as per the Rural /Urban Profile preparation Procedure, 2075.

- Document and will be further discussed with the appointed consultant.

Design and Development of user friendly application to integrate information system

- A fully matured and bug free web-based system to be handed over to the Municipality Office with complete source code and database.
- If the users want to search locations, institutions or unique house number than it shows the short route along with the direction from the same system.
- User friendly interface with high security and speed must be delivered.
- Development of mobile (android) as well web-based application for data retrieval and observation. It should be designed in such a way that data can be updated.
- Hosting and Maintenance for the first year must be included in the quotation.
- The system must be able to handle 3 levels of User Accounts/user groups for simultaneous use and with different privileges and hierarchy.

A. Administrative/ IT department of Municipality

The Municipality Information System will be used by Administrative/It Department of Municipality with full privileges and features. It will have complete rights to view, edit and update the Municipal information database.

B. Ward executives

The Municipality Information System will also be used by Ward offices with limited privileges and features. It will have rights to view and update individual ward information. It will have right to update/edit limited and dedicated municipal database.

C. Peoples

Individual people can read all the reports and queries generated by the application and in case of his own information one can entirely view details, but only have a liberty to comment on his own information.

Capacitate and institutionalize the municipality office:

- Conduct presentation and orientation with all the stakeholders of the municipality and ward offices making them familiar with the system and its utilization.
- Conduct several training sessions as per the requirement so as to capacitate the personnel assigned by the municipality to make them well versed with the system developed.

Facilitate the municipality with extensive reporting of households and institutions

information:

- The system has to produce instant reports of households, residents, land masses, topography, ward segregation, demographics, landmarks and all other digitalized data.
- Dynamic info-graphical reporting as per the requirement of the Municipality to be made easily accessible in the system.

A fully scalable information system that can be used for each household to register and update

Information on their own at later stage:

- The Municipality Information System must be scalable so that in future all residents can login to the system to view their details and update or request for update accordingly.
- The system must be able to take 20000 or more user account.

5. Study methodology

The study method constitutes the following phases.

- Preliminary overall preparation and planning for field mobilization and questionnaire finalization.
- Organization of Municipal level orientation meeting and field level meeting.
- Preparation of Compatible mobile application for household/ Institutional data collection and training for enumerator as well as municipal coordinators.
- Collection of Primary data using Tab/GPS in each household within the municipality.
- Design and Development of application for different hierarchy of users.
- Presentation and collection of feedback from the concerned agencies.

6. Roles & Responsibilities

Role of the Consultant

- Consultant shall be responsible to supply technical personnel and complete consulting work as stipulated in ToR. And work under the team leader. Consultant's personnel shall directly participate in fieldwork and plan preparation, under the supervision and instructions of the team leader. The field work among other things includes data gathering, ward and municipal level meetings as per requirement.
- Consultant shall be responsible for making available of logistics including computers, printer, scanner photocopier, and vehicle as stipulated in ToR for use in the field.
- Consultant shall be responsible for undertaking necessary training programs to municipal as
well as departmental technical personnel on data collection, management and other relevant
computer skills that are required in connection to profile preparation.
- Keep appropriately the records and minutes of the meetings/ workshops.
- Gather data and carry out necessary analysis and inform the outcome of such analysis to the team leader and to the planning team during plan preparation.
- Undertake the task of preparing digital profile in complete as described in this TOR, under the supervision of the team leader.
- The consultant shall accomplish the work in close contact and guidance with the Office of Municipal Executive.
- Consultant shall be responsible for Annual Maintenance (AMC) for the first year.

Role of the Municipality
